

SPECIFICATION AMENDMENT

Please amend the Title as follows:

“High-Pressure Discharge Lamp Having a Infrared Interference Filter”

Please amend the Abstract as follows:

“The invention relates to a high-pressure discharge lamp[[, at least comprising]]
including a burner (2) which has a burner wall (25) and a discharge chamber (21) enclosed by
said burner wall (25), wherein a region with a lowest temperature and a region with a highest
temperature establish themselves at the [[inner and the outer]] contour of the burner wall (25)[[,
respectively,]] during operation of the lamp and in dependence on the mounting position of the
lamp, and a multilayer interference filter (3) which is provided on a portion of the outer contour
of the burner wall (25), which interference filter (3) reflects towards the discharge chamber (21)
mainly light in that wavelength range of the IR light that has a causal relationship to the
maximum emissive power of the material of the burner wall (25).”
